**EDUCATIONAL OBJECTIVES OF THE MODULE**

The course has as its main objective the presentation of the institutes of the financial market law, banking and insurance, with particular reference to the discipline of intermediaries, instruments, trading on the stock exchange and listed companies. In particular, the course analyzes the regulation of financial intermediaries and financial instruments that emit, their negotiation even in stock markets, the rules of conduct of the operators, ultimately, the responsibility to protect the market and savings rules. In addition, the course examines the discipline of the corporate governance of listed companies, the concept of governance, the protection of minorities, the system of controls. Finally, it analyzes the regulation of banks, banking and insurance companies, the new insolvency system. There are, in closing, the Special Framework references to the crisis of the financial intermediaries, banks and insurance. Ultimately, in addition to presenting tools, the course also aims to outline critically the discipline of financial market law, banking and insurance, in order to equip students with the necessary interpretative categories.
